

Flash point

Businesses today are driven to be innovative, competitive and ready for the future. But for many, their out-of-date infrastructure is sabotaging digital transformation.

Flash storage improves speed and performance, but modern storage requires more than just faster performance. It requires **new capabilities**.

Next level transformation

3 things you can't afford to miss when considering flash storage

PREDICTIVE ANALYTICS

42%

say the need to improve infrastructure agility through predictive analytics is a challenge

CLOUD READY STORAGE

30%

are challenged by the requirements for strong integration between Cloud and on-premise systems

A BETTER, SIMPLER STORAGE EXPERIENCE

36%

say their current infrastructure can't grow to meet emerging needs and technologies
