

HPE GreenLake

Balance IT flexibility, cost and control with accelerated outcomes on your terms

The challenge

Whether it's real-time analytics, operating a database platform, or protecting apps and data, business leaders now widely prefer to consume the outcomes they want, when they want them, and pay only for what they use. But security and control are still high priorities for many workloads, driving the need for an on-premises solution that delivers the flexibility and economic advantages of the cloud.

Business demands flexibility, but IT needs control

Top business reasons for utilizing cloud solutions:
