# Introducing the first hyperconverged infrastructure solution with Composable Fabric

HPE SimpliVity with Composable Fabric

**Your hyperconverged infrastructure (HCI) needs a modern network**

**High complexity**

**Low complexity**

**Empower the VM admin with true hyperconvergence from data center to edge**

Hyperconverge everything with **scale-out compute, storage, and networking**. The IT admin efficiently controls the full stack.

**Friction-free scale** for virtual workloads. Start small, scale linearly to reach very large deployments. Run any VM, anywhere, anytime.

Automation everywhere. VM admin enjoys end-to-end policy **automation, visibility, and intelligence**. Global unified management via familiar interface.

Compute + Storage + Networking =  
**The only true HCI solution available today.**

**Only from HPE**

Access the only fully integrated, true **HCI solution** on the market today—**HPE SimpliVity** with **Composable Fabric**.
