HPE SimpliVity

An intelligent, hyperconverged platform that streamlines IT operations by combining IT infrastructure, advanced data services, and AI-driven operations into a single, integrated solution.

**Advanced data services**
- Streamline operations with policy-based, VM-centric management
- Protect data with built-in backup, resiliency, and disaster recovery
- Integrated with HPE Cloud Volumes for public, cloud backup needs and HPE StoreOnce for long-term data retention and compliance requirements
- Reduced capacity utilization by up to 10x guaranteed with always-on deduplication and compression

**Global intelligence with HPE InfoSight**
- Visibility to system details at the federation, cluster, and node level
- Predictive analytics provides insights into historical cluster capacity consumption and prediction to full
- Proactive wellness alerts alleviate support issues and reduces operational expenses
- VM resource utilization provides visibility into VM neighbors and insights into VM storage utilization

**Multiplatform strategy**

__HPE SimpliVity 380__
- Ideal for storage intensive workloads
- Multiple all-flash, hybrid and mixed-use configurations
- Hardware accelerated or software-optimized always-on deduplication and compression
- General purpose and VDI workloads
- Support for latest generation high performance Intel® Xeon® Scalable processors

__HPE SimpliVity 325__
- Compact yet powerful, ideal for VDI, ROBO/edge, and SMB/Midmarket use cases
- Highly dense, 1U, single 64-core AMD EPYC processor system delivers twice the desktop density vs. alternatives
- 50% lower dollar per desktop with peak and predictable performance vs. alternatives
- Full HPE SimpliVity software functionality

HPE SimpliVity has always been about simplifying the software-defined IT experience by streamlining IT operations, enabling VM management and mobility, and providing built-in data efficiency and data protection.

Today, we're entering a new era for hyperconverged infrastructure—one that shifts the focus from software-defined infrastructure to AI-driven operations. With groundbreaking capabilities and the introduction of HPE InfoSight for HPE SimpliVity, HCI has risen to a new level of performance. One that is key to creating an intelligent foundation for your private cloud.

### Reimagine hyperconverged: Software-defined to AI-driven

**A NEW ERA IN HCI**

IT is under pressure to keep up with the demands of the digital enterprise. Customers with virtualized environments seek to address complexity in the data center and at distributed sites (edge, ROBO).

They want to simplify by streamlining overall operations, improving efficiency, overcoming rigid architectures and processes, and finding new ways to innovate and grow.

Since debuting over a decade ago, hyperconverged infrastructure (HCI) remains a popular choice for IT transformation. IDC estimates that sales of hyperconverged systems grew 70% in 2018 to nearly $6.6 billion in total value and are poised to grow at a 25.2% CAGR through 2022. According to Gartner, the HCIS appliance market is expected to reach $8.5 billion in revenue by 2023.

HPE SimpliVity has always been about simplifying the software-defined IT experience by streamlining IT operations, enabling VM management and mobility, and providing built-in data efficiency and data protection.

Today, we're entering a new era for hyperconverged infrastructure—one that shifts the focus from software-defined infrastructure to AI-driven operations. With groundbreaking capabilities and the introduction of HPE InfoSight for HPE SimpliVity, HCI has risen to a new level of performance. One that is key to creating an intelligent foundation for your private cloud.

### Intelligently simple

Intelligent HCI simplifies deployment, management, scale, and troubleshooting through software-defined infrastructure, policy-based automation, unified management, and AI.

**All-in-One system**
- An all-HPE solution engineered and fully integrated for HPE SimpliVity
- Start small and scale as your business grows

- Save costs with smaller footprint, power/cooling, space, and licensing
- Reduce costs by 69%

**Global unified management**
- Centrally manage data center and edge computing resources from a single interface, including global federations, infrastructure, hypervisor, and data protection
- Manage VMs and seamlessly move data across sites using the intuitive and familiar VMware vCenter
- Role-based access for backup users to search for and restore crash consistent backups
- Increase time to spend on innovation and new projects by 91%

**One-click upgrades**
- Simplify lifecycle management with orchestrated, one-click software, hypervisor, and firmware upgrades

**Rapid deployment and zero-downtime refresh cycles**
- Rapidly deploy and scale hyperconverged building blocks to meet changing demands
- Deploy virtualized or container-based workloads quickly and easily across your entire environment, including SQL Server, VDI, Collaboration, DevOps, and Docker
- Flexibly add or remove modular systems non-disruptively to meet business needs

**Automated tuning**
- Always optimal performance, efficiency, resiliency without knobs or tradeoffs

**Global Intelligence**
- HPE InfoSight uses telemetry and machine learning to equip HPE SimpliVity environments with the ability to predict and prevent infrastructure problems before they happen

High-end graphics virtualization is supported by NVIDIA® GPUs.

HPE SimpliVity 2600
- Ideal for compute intensive workloads
- High density server for space constrained environments
- Highest GPU per rack unit (RU) density
- Software optimized for always-on deduplication and compression
- General purpose and VDI workloads
- Support for latest 2nd generation high performance Intel Xeon Scalable processors

Mixed federation strategy
- Mix clusters within the same federation, e.g., HPE SimpliVity 380 at the core data center, HPE SimpliVity 380, 325, or 2600 at the edge

HPE SIMPLIVITY PORTFOLIO
The HPE SimpliVity portfolio intelligently simplifies IT by combining AI, infrastructure, and advanced data services for virtualized workloads—into one, simple solution.

Based on HPE ProLiant or HPE Apollo-based servers, this fully integrated, all-HPE solution, engineered and optimized for HPE HCI. Delivered in single, high value building blocks, start small and scale to 16 nodes per cluster/96 nodes per federation and for large ROBO environments, 48 clusters per federation. For campus-scale deployments, 16-node stretch clusters are available.

HPE SIMPLIVITY 380
HPE SimpliVity 380 is based on the HPE ProLiant DL380 server, and is ideal for high-performance, storage-intensive workloads. This solution is available with either hardware accelerated or software-optimized data efficiency capabilities, and includes all flash or hybrid flash storage, easy management, robust data efficiency, and built-in data protection—all at a very attractive price point.

HPE SIMPLIVITY 325
The HPE SimpliVity 325 provides full software capabilities, security and performance in a highly dense, 1U model. The most compact solution in the portfolio, it includes a single, 64-core AMD EPYC processor, delivering twice the desktop density and half the cost of previous models. Built on the HPE ProLiant DL325 Gen10 server platform with all-flash storage, the solution is ideal for VDI, ROBO/edge, and SMB/Midmarket customers.

HPE SIMPLIVITY 2600
The HPE SimpliVity 2600 is an ideal solution for edge and VDI workloads and is based on HPE Apollo 2000 servers. It’s optimized for environments that require higher density nodes. And is the first to deliver consistent performance with software-enabled dedupe and compression and has been tested and validated by HPE and Login VSI.

SERVICES
With access to new self-serve tools, expert advice, and an enhanced support call experience, HPE Proactive Care for HPE SimpliVity can give you the support experience your IT and business need.
